Education

Gayatri vidya parishad college, visakhapatnam

Expected May 2027

Bachelor of Technology in computer science Engineering (GPA: 9.08 / 10)

Gayatri vidya parishad college of Engineering

Tirumala Junior College, Rajahmundry

2023

Intermediate (MPC) - Percentage: 97.6%

Board of Intermediate Education, AP

Tirumala School, Rajahmundry

2021

Secondary School Certificate - GPA: 10/10

Board of Secondary Education, AP

Projects

Cloud-Based Resume Analyzer | AWS S3, AWS Lambda, API Gateway, Python

- Designed and implemented a cloud-based resume analysis system using a serverless architecture.
- Used Amazon S3 for storing resumes and AWS Lambda (Python) for backend processing.
- Integrated API Gateway to enable secure communication between frontend and backend services.
- Applied basic text processing techniques to extract and analyze resume content.
- Developed understanding of event-driven computing, scalability, and cost-efficient cloud design.

Cloud Infrastructure and Serverless Website Hosting | AWS EC2, S3, VPC, CloudFront

- Explored different cloud deployment models by hosting a static website using both VM-based and serverless approaches.
- Deployed a website on an EC2 instance inside a custom VPC to understand networking, SSH access, and server management.
- Migrated the same website to Amazon S3 with CloudFront to study scalability, latency, and content delivery.
- Compared VM-based hosting and serverless hosting in terms of performance, maintenance effort, and scalability.

Cloud-Based Web Application | Node.js, Express.js, MongoDB

- Developed a backend-focused web application to understand client-server architecture and RESTful APIs.
- Implemented authentication and authorization mechanisms to study secure access control.
- Worked with MongoDB to understand NoSQL data modeling and CRUD operations.

Technical Skills

Programming Languages: C, C++, Python

Cloud & DevOps: Amazon Web Services (EC2, S3, IAM, VPC, CloudFront, Lambda, DynamoDB), Docker, GitHub Actions (CI/CD), Linux, Shell Scripting

Backend & Systems: Node.js, MongoDB, Serverless Architecture

Cloud & Networking Concepts: Virtualization, Load Balancing, Scalability, High Availability, Cloud Security Basics, Monitoring (AWS CloudWatch – basics)

Tools & Platforms: Git, GitHub, VS Code

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks

Achievements

- Solved over 500+ problems on various CP Platforms and also earned SQL50 badge on LeetCode.
- Secured **2nd place** in DecodeX coding competition conducted by the CSI Club among 100+ participants.
- Knight badge in [LeetCode](#) with Maximum contest rating of 1892
- Completed **AWS Cloud AI/ML Certification**, gaining hands-on experience with machine learning services on AWS.
- Completed **AWS Cloud Data Engineer Certification**, demonstrating proficiency in cloud-based data engineering tools and services.

Social Engagements

Club: Member of the Computer Society of India (CSI) and Youth for Sustainability.

Design: Created promotional creatives using Canva for Youth for Sustainability Club.

Sports Engagements: Chess, Badminton.
